**Thanks For Downloading Sports Templates's Sports Jersey Texture PSD Logo Mockup!**

01 Once you Open the PSD Go to the "Your Logo Here" Layer and Double Click on the small Folder Icon right on top of the Preview

02 After you Double Click, a smart Object will open up.. add your logo there and save the Smart Object

03 A Photoshop Action is included with the Freebie, once you've Added your Logo, Load the Action "SportsTemplates.atn" and play it while the file is open, you should get a nice Lens Blur effect with Acurate Depth of Field.

04 Make Sure the "disp_.psd" is in the same folder with the main Mockup File.

05 Enjoy :)
